GENERAL RULE ITEM 1300

Buffer Car Requirements for Ethanol Unit and Sweep Trains

Buffer cars are to be supplied and maintained by the shipper and must pass rail car inspections. Failure of railcar to meet inspections will result in Union Pacific's reserving their right of refusal to provide train service. Buffer cars are considered non-revenue cars when moved within a unit or sweep train of ethanol. Mileage allowance payment will not apply.

Buffer cars are to be placed between the locomotive engine and ethanol cars as required by Federal Regulations. This applies to both loaded and empty last contained cars. Two (2) loaded buffer cars are required for all unit and sweep trains destined to facilities in California, Texas, Sauget, IL, and Midland, NC (CSXT). One buffer car will be in place at the head end of the train, with the second buffer car being in place at the rear end of the train.

One (1) loaded buffer car is required for unit and sweep trains interchanging to the CSXT or NS except as noted above. The one buffer car will be in place at the head end of the train.

Buffer cars must meet the following requirements:

GENERAL RULE ITEM 1300

Buffer Car Requirements for Ethanol Unit and Sweep Trains

Buffer cars are to be supplied and maintained by the shipper and must pass rail car inspections. Failure of railcar to meet inspections will result in Union Pacific's reserving their right of refusal to provide train service. Buffer cars are considered non-revenue cars when moved within a unit or sweep train of ethanol. Mileage allowance payment will not apply.

Buffer cars are to be placed between the locomotive engine and ethanol cars as required by Federal Regulations. This applies to both loaded and empty last contained cars. Two (2) loaded buffer cars are required for all unit and sweep trains destined to facilities in California, Texas, Sauget, IL, and Midland, NC (CSXT). One buffer car will be in place at the head end of the train, with the second buffer car being in place at the rear end of the train.

One (1) loaded buffer car is required for unit and sweep trains interchanging to the CSXT or NS except as noted above. The one buffer car will be in place at the head end of the train.

Buffer cars must meet the following requirements:

- a) Must be a boxcar, covered hopper, gondola or tank car. The buffer cannot be a flat car.
- b) Must have a high-strength coupler (Grade E coupler).
- c) The length of the car must be at least 45 feet and not greater than 75 feet.
- d) Must be loaded with a non-hazardous inert material that does not shift in train service.
- e) Gross weight of car must be a minimum of 45 tons.
- f) It is the responsibility of the shipper to provide buffer cars that are in good mechanical condition. If a car fails inspection Union Pacific retains the right to refuse to provide train service.

GENERAL RULE ITEM 1302

SWEEP TRAINS

Unit and sweep train origin and destination locations must be pre-approved by Union Pacific. Once origin and/or destination locations are approved, it is the customer's responsibility to schedule trains within Union Pacific's Car Forecast System.

[i]

Sweep Rates apply when cars are shipped and billed in conjunction from two (2) approved origins to form a unit train to a single approved destination. Each origin must provide a minimum of 25 cars from each plant origin to create a unit train with a minimum 80 cars.

General Application Rules for Item 1302-BH

1. Switching charges of ALS at destination will be absorbed.
2. Switching charges of LRPA at destination will be absorbed up to \$330.00.
3. Switching charges of BNSF at origin will be absorbed up to \$295.00.
4. Switching charges of BNSF at destination will be absorbed up to \$295.00.
5. Switching charges at origin will be absorbed up to \$160.00.
6. Switching charges at destination will be absorbed up to \$160.00.
